WHAT IS CLAIMED IS:

1. A paint container, com	prising:
---------------------------	----------

- a body having a bottom, a plurality of side walls, and a top;
- an attachment mechanism located proximate the top;
- a cap configured to be secured to the attachment
- 5 mechanism;
- a spout extending upward proximate the top and at least
- 7 partially surrounded by the attachment mechanism, the spout permitting
- 8 paint to be poured from the paint container; and
- a channel located between the attachment mechanism and
- the spout, wherein paint spilled into the channel flows back into the paint
- 11 container.
- The paint container of claim 1, further including an opening
- adjacent the channel through which the paint flows back into the
- 3 container.
- The paint container of claim 2, wherein the spout is sized to
- 2 permit entry of at least a two inch brush into the container.
- 1 4. The paint container of claim 1, further comprising an opening
- 2 into the body disposed adjacent the spout and sized to permit entry of at
- 3 least a two inch brush into the container.
- 5. The paint container of claim 4, further including an edge
- 2 having a straight section adjacent the opening.
- 1 6. The paint container of claim 5, wherein a portion of the edge
- 2 includes a plurality of teeth extending therefrom into the opening to form
- з a comb.

- 7. The paint container of claim 1, further comprising a handle formed into one or more of the plurality of side walls.
- 1 8. The paint container of claim 1, further comprising a second 2 handle attached to the top.
- 9. A stackable paint container, comprising:
- a body having a bottom, a plurality of side walls, and a top;
- 3 and
- 4 a spout extending from the top;
- 5 wherein the bottom is molded in a convex shape, such that
- 6 the bottom is configured to receive the top of a second paint container.
- 10. The paint container of claim 9, further comprising a splash guard disposed proximate the spout.
- 1 11. The paint container of claim 9, wherein the body is constructed of plastic.
- 1 12. The paint container of claim 9, further comprising an opening into the body disposed adjacent the spout, the opening including a
- 3 straight edge.
- 1 13. The paint container of claim 9, further comprising a cap sized to function as a paint holder.
- 1 14. The paint container of claim 9, further comprising a handle formed into one or more of the plurality of side walls.
- 1 15. The paint container of claim 9, further comprising a second 2 handle attached to the top.

top;

	 repaired, comprising.
2	a body having a bottom, a plurality of side walls, and a
3	a spout proximate the top;

a first handle located proximate the side walls; and

A paint container comprising:

- a second handle proximate the top and attached to the body along a line perpendicular to the plane defined by the first handle and the spout.
- 1 17. The paint container of claim 16, wherein the second handle is pivotally connected to the body.
 - 18. The paint container of claim 17, wherein the first handle is located in a corner of the body.
- 1 19. The paint container of claim 18, wherein the spout is located adjacent a corner of the body opposite the first handle.
- 1 20. A paint container, comprising:

16.

- a body having a bottom, a plurality of side walls, and a top, the top including a flat region; and
 - a spout extending from the flat region and substantially surrounded by an attachment mechanism;
- wherein the plurality of sides are attached to one another to form a circumference that is noncircular.
- 21. The paint container of claim 20, further comprising an open channel formed through the top permitting spilled paint to flow into the paint container.
- The paint container of claim 20, further comprising a splash guard disposed proximate the spout.

- The paint container of claim 20, wherein the body is constructed of plastic.
- 1 24. The paint container of claim 20, further comprising an 2 opening into the body disposed adjacent the spout, the opening including 3 a straight edge.
- The paint container of claim 20, further comprising a handle formed into one or more of the plurality of side walls.
- 1 26. The paint container of claim 20, further comprising a second 2 handle attached to the top.
- 1 27. A paint container, comprising:
- a body having a bottom, a plurality of side walls, and a top;
- a spout extending from the top; and
- 4 a holder formed in the top configured to support a paint
- 5 brush.
- The paint container of claim 27, wherein the holder includes a width sufficient to hold at least a two inch brush.
- The paint container of claim 27, wherein the holder includes a width sufficient to hold at least a three inch brush.
- 30. The paint container of claim 28, further comprising an open channel formed through the top permitting spilled paint to flow into the paint container through an opening.
- 31. The paint container of claim 30, wherein the holder is operatively connected to the opening to permit paint to flow from the holder to an interior of the container.

- 1 32. The paint container of claim 27 wherein the holder is 2 configured to hold a predetermined amount of paint in a first position.
- The paint container of claim 30, further comprising a cap removably attached to the top to cover the spout and the opening.
- 1 34. The paint container of claim 33, wherein the cap may be 2 placed within the holder in at least one of an upright position and an 3 inverted position.
- 1 35. The paint container of claim 33, wherein the cap is configured to hold paint in an inverted position.
